An application has been submitted by Mayo Jacksonville, Florida, an approved provider of continuing nursing education by the Florida and Georgia Nurses Association for approval of 10 contact hours.

An application has been submitted by American Board for Transplant Certification for 10 CEPTC category I continuing education hours.

Purpose
The Northeast Florida and Georgia Chapters of the International Transplant Nurses Society are combining to present the Sixth Annual Southeast Regional Transplant Symposium in September 2013.

The purpose of the symposium is to provide continuing education to healthcare providers in the transplant field, including nurses, pharmacists and other allied health professionals.

The goal is to provide a quality educational program offering specialty continuing education credits to allow for continued certified transplant specialists.

We will reach out to include all transplant centers nationwide with a concentrated focus on the southeast regional transplant programs.

The goals of the Annual Southeast Regional Transplant Symposium are to:
• Provide a network for communication among professional nurses with a focus and commitment to transplantation.
• Provide a means of continuing education for professional nurses with a focus in transplant nursing.
• Examine new trends in transplantation affecting patient care and the role of the transplant nurse.
• Promote and support research in transplant nursing.
• Foster an awareness of ongoing ethical considerations in procurement, donation and recipient awareness.

We encourage every nurse, clinician and health care professional who has an interest in transplantation to attend the Annual Southeast Regional Transplant Symposium.

Sponsors – as of April 13, 2013
